PROFESSIONAL SUMMARY

I design and develop software solutions focused on maintainable systems that can evolve over time, from data modeling to business logic implementation.

EDUCATION

University of Tarapacá	2023 – Present
Civil Engineering in Computer Science	Iquique, Chile
Fourth-year student.	

EXPERIENCE

Software Developer	2025 – Present
Tarapacá Regional MTB Championship	Iquique, Chile
- Centralized web platform used by 7 clubs and over 240 riders to manage the Tarapacá Regional MTB Championship. - Management of registrations, rider approvals, bib assignment, event calendar, results, and rankings with real-time updates. - End-to-end design and implementation of the system, including database modeling, admin panel, public website, and integration with the race timing system. - Platform used throughout the 2026 season, consisting of 7 race events, replacing processes previously managed through spreadsheets.	

Software Developer	2025 – Present
Joyería Fran	Iquique, Chile
- E-commerce platform designed to digitize the operations of an existing business through an online catalog, checkout flow, and administrative panel. - Product, inventory, and order management, along with payment integration through Mercado Pago. - Server-side validations and access control to protect administrative operations and the purchasing process. - Centralization of processes previously managed manually, including catalog management, stock control, and order tracking.	

TECHNICAL SKILLS

Languages | TypeScript, JavaScript, SQL, Python

Technologies | React, Next.js, Node.js, PostgreSQL, Supabase, Git

Languages | Spanish (Native), English (Intermediate)
