PROFESSIONAL SUMMARY

Computer Engineering student focused on designing and developing software solutions with an emphasis on software architecture, scalability, and data integrity.

EDUCATION

University of Tarapacá	2023 – Present
Computer Engineering	Iquique, Chile
Fourth-year student.	

EXPERIENCE

Software Developer	2025 – Present
Regional MTB Championship Tarapacá	Iquique, Chile
- Developed a web platform to centralize registrations, race results, and rankings for the Regional MTB Championship Tarapacá. - Replaced a spreadsheet-based workflow with a centralized platform used by the seven organizing clubs, improving coordination and information availability. - Designed and implemented the complete solution, including database modeling, an administrative dashboard, public website, and integration with a timing system to automate race result processing.	

PROJECTS

Jewelry Fran E-commerce Platform	2025 – Present
- Developed an e-commerce platform to digitize the sales process through an online product catalog and administrative dashboard. - Implemented an administrative dashboard, product catalog, and Mercado Pago integration.	
DeathCloud Gaming Services Platform	2026 – Present
- Developed a full-stack web platform to centralize authentication, user management, game catalog, and real-time communication for a gaming ecosystem. - Designed and implemented a layered architecture separating frontend, backend, and database components to improve maintainability and scalability.	

TECHNICAL SKILLS

Languages | TypeScript, JavaScript, SQL, Python, Java

Technologies | Next.js, React, Node.js, Express, PostgreSQL, Supabase, Git, Vercel

Spoken Languages | Spanish (Native), English (Intermediate)
